Supplement of Off T.Baskin #000332 on 05/13/2011 23:58

On 05-13-11 at about 1818 I responded to 415 1st St. North, apartment 200, on a DOA call. I arrived at about 1823 and met with Sgt. Horn and squad 122 who had already arrived. Squad 122 passed along notes they had taken up to this point to me. RP-1 (V-1's brother) was present along with V-1's other brother OT-1 in the apartment, and a friend OT-2. OT-1 had also been living at this address for about a month with V-1. Rescue had already left the apartment and determined that V-1 was deceased.

RP-1 said that he last made contact with V-1 at about 0356. RP-1 said that he and V-1 were out with friends the night prior to multiple clubs (Seven, Aqua, Sneaky Petes). RP-1 said that V-1 didn't seem like his normal self in hindsight. RP-1 said that V-1 took 2 Percocet prior to having dinner at Seven Restaurant. RP-1 said they stayed out late and returned to 415 1st. St. N, Apt 200 after bar close and made some breakfast. RP-1 said that V-1 then went to bed. RP-1 said that V-1 seemed very intoxicated. RP-1 said that V-1 did not suffer from any medical condition that he knew of that could be causal. RP-1 said that V-1's medical treatment was conducted by NHL Team doctors. V-1 did recently get released from a treatment facility, perhaps an oxycodone clinic. RP-1 said that he and OT-1 checked on V-1 who was lying on his back in bed at about 1800 and he was cold and stiff. RP-1 said that he then called 911. RP-1 said that Joanne () and Len () were V-1's next of kin.

OT-2, who was a personal trainer for V-1 said that V-1's recent medical checks did not suggest that V-1 had any threatening medical condition. On the contrary OT-2 said that his physical condition was very good. OT-2 said tests are done on players in preseason physicals.

I observed V-1 lying on his back in bed. V-1 had a white foam looking cone coming from his lips about 3/4" high. I observed a bottle of Prochlorperazine (10 mg tabs, quantity 12, prescribed 01-15-11 by Dr. Weissman, with 9 remaining) along with a bottle of Ambian (12.5mg tabs, quantity 30, prescribed on 03-24-11 by Dr. Weissman). The bottle contained 7 pills found to be 50mg Tramadol and 11 pills found to be Vicodin 5-500 and no Ambian. This information was determined by calling the poison control center and describing the pills. There was a dollar bill rolled up in V-1's bathroom. There was a small amount of vomit on the floor at the foot of the bed about 6" round. It appeared the vomit had been partially wiped up.

Car 710 was called out. Car 710 arrived and after conducting their business summoned the M.E. to come to our location.

The family soon departed and went to a private waiting area at the M.E.'s request to further check the apartment. The M.E. arrived and after checking the apartment and then allowed the family to gather with V-1. The family soon departed and the M.E. collected V-1 and left. We also left the scene.

OT-2 called Car 710 shortly after we left and asked that we return as there was potential for people who the family may not want around to show up. Given the sensitivity of the situation OT-2 wanted to have only the family and closest friends around. We stayed for about 20 minutes without incident and cleared the scene.
